

Project Cargo Services is a division of HT that provides specialized cargo transportation services to shippers of heavy and over dimensional equipment and integrated project logistics management for engineering, procurement and construction companies servicing energy, mining, chemical, petrochemical, pipeline, infrastructure and other sectors.

The construction of industrial plants and large infrastructure projects as well as the manufacturing of oversized equipment and modules present highly challenging and complex transport logistics problems that often involve the transportation of very heavy and oversized loads.

Based on our worldwide organization and our air and ocean freight transportation capabilities, we offer integrated turnkey project forwarding and logistics management services to various industries on a global scale.

We develop transportation solutions that are tailor-made for each project and allow fast and secure shipment of plant parts as well as bulky and oversized goods for a great variety of different types of projects. Our services are especially suited for companies involved in constructing refineries, LNG and petrochemical plants, mining emplacements or extensions, power plants and many other types of industrial plants. In addition, we have specialized solutions for suppliers of other heavy and oversized equipment and modules. We manage complex and challenging projects by establishing dedicated teams assigned and deployed in response to your needs. We are ready to put our experience and passion for solutions to work for you by complementing your core competencies, thus allowing you to focus on your customers.

KEY SERVICES

We work closely with you to deliver solutions that bring you cost savings and create value for your company. You benefit from our industry-specific expertise that we have gained from the completion of numerous large and small projects in all industry segments worldwide over the past two decades. Our highly specialized, dedicated workforce and our global market presence also work to your benefit. The purchasing power of the HT and our strong and solid background in the air freight and ocean freight market are additional elements in an optimized business package.

Besides our core air and ocean freight products as well as multimodal transport solutions, we offer specific project services like:

- Turnkey transport solutions
- Route & Site surveys
- Transport engineering
- Door-to-door project services
- Warehousing
- Logistics Project Management
- Ocean Vessel chartering
- Customs Clearance & Documentation
- Heavy Lift/Over dimensions cargo handling & transport
- Global Web based tracking & Tracing
- Critical response team

Planning

As a member of your tender team, we will assist you in winning the contract by giving you detailed advice on transport issues, including local expertise in countries of destination and origin.

Origin Service

Vendor expediting, collection, marshalling, packing, export customs clearance, delivery to port are all taken care of by HT from any of our offices around the globe.

Marine chartering

Customized full and part chartering of break-bulk, heavy lift and river vessels, barges, tugs and supply boats around the world through our experienced global marine charter desks at our global offices.

Project destination service

HT project department uses the local expertise and facilities of HT and their agents in over 150 countries to provide first-hand information on import regulations, customs clearance procedures, infrastructure specifications and any other issues as required.

Project Management

We provide the following project management services: Project planning, organizing, staffing, directing and controlling logistics. We apply our collective knowledge, skills, tools and techniques to a broad range of activities to meet the requirements of every particular project.

Key Projects Solutions

HT with its global offices as well as a long experience in the sphere of freight traffic allows arrangement of optimum transportation schemes in compliance with the highest international standards.

Our multimodal shipments of cargoes of various dimensions are made under the rates which are most profitable for customers and with due regard to all their wishes as for routing and terms of delivery.

➤ Cargoes from South-East Asia are delivered by vessels to the ports of Istanbul (Turkey), Mauripol (Ukraine), Novorossiysk (Russia) with their further transshipment to sea-river going vessels for their delivery to final destinations through Volga-Don Channel.

➤ Cargoes from Italy, France, Switzerland and Austria can be transported by auto transport to the ports of Duisburg, Regensburg and shipped by river barges to the ports of Mauripol, Reni, Ismail, (Ukraine) where there is a possibility of their transshipment to other vessels and of a further delivery to one of Russian ports of the Azov-and-Black sea basin whence they shall be further transported by auto, railway or river transport;

➤ Cargoes from South America can be shipped by vessels to Istanbul or Mersin where they will be transhipped to vessels sailing to the southern ports of Russia – Rostov-on-Don, Taganrog, Yeisk and Novorossiysk whence they will be further shipped by railway or river transport;

➤ Also one of the possible ways is a delivery to Novorossiysk with a further transshipment to an auto and railway transport for the delivery to a final destination, or a delivery to the port of Mariupol with a transshipment to sea-river going vessels for a shipment to Rostov-on-Don with a further transshipment to an auto and railway transport for the delivery to a final destination. Under a customer's wish it is possible to make a shipment by railway from Mariupol to a final destination.
