

Founded in July 2009, HT, has already proven to be a reliable and diligent freight forwarding / shipping agency company in the Ukrainian market. Due to efficient efforts of the entire group, HT has achieved a big success in forwarding business during the rather short period of work. HT's core business in Ukrainian market is chartering brokerage, shipping agency, port forwarding and forwarding of containerized cargoes. We are represented in all major ports of Ukraine, supporting our own service through Odessa head office. Our good market reputation, high standards of service quality allows us to establish very good relations among different levels of Ukrainian Authorities.

HT offers a wide range of freight forwarding services in ports of Odessa for transportation and handling of the cargo being shipped to any destination through the Odessa ports.

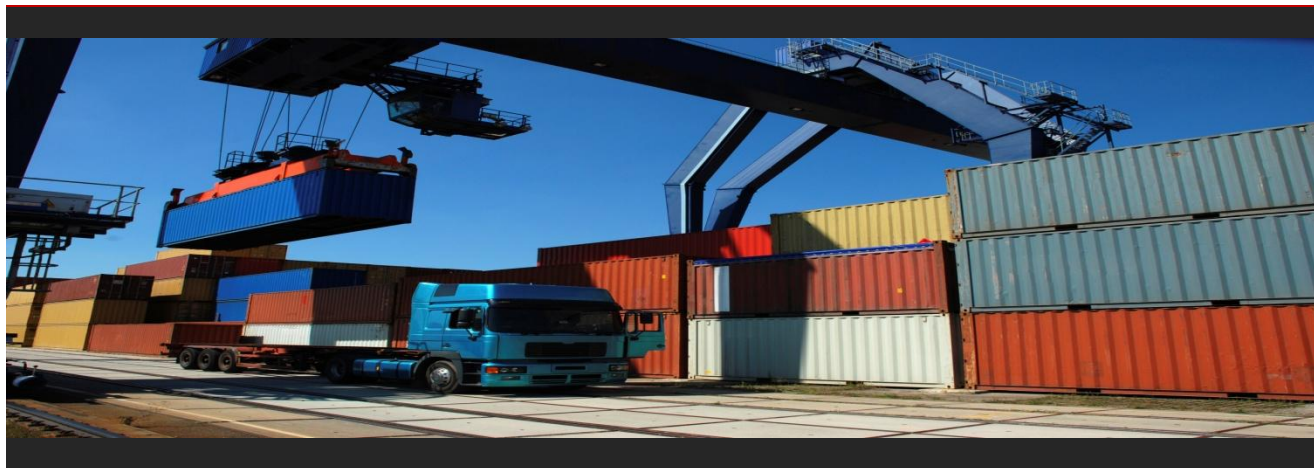

At container terminals in Odessa ports, HT arranges all cargo handling including storage and re-packing of container cargo, and handling of export, import and transit cargo.

Due to a direct agreement on port freight forwarding with "Odessa Sea Trading Port" and Ilyichevsk Port HT has full access to port services and operates directly on the territory of the port. Delivery time is

reduced as HT itself carries out the major works on worldwide container transportation.

**We carry out a wide complex of transport-forwarding services:**

- Complex forwarding and full volume of cargo operations in Odessa sea Trading port, Ilyichevsk Port and other ports of Ukraine;
- Transfer of cargoes in the Odessa and the Ilyichevsk ports by own port forwarding services;
- Rail transportation of any cargoes, including transit across Ukraine, Belarussia, Moldova, Russia and CIS countries;
- Tracking of cargoes on railways of Ukraine, the CIS;
- Warehousing and storage of cargoes, processing and complete set of parties on covered warehouses;
- Regular LCL groupage services
- Customs clearing of import cargoes, customs declaration of export and transit cargoes;
- Chartering of the tonnage;
- The organization of qualitative and quantitative examination of cargoes; ;
- Insurance of cargoes on behalf of the customer.

Container transportation is the most quickly developing field in Ukrainian transport industry. Each year brings new liners to life, the cargo volumes is increasing dramatically. Our company has the special team of well-experienced staff in this field.

**The complex of our services on export, import and transit container transportation includes the following:**

- Representing client's interests at port agencies and container liners;
- Receiving and presenting the empty container for loading;
- Minor lots consolidation (LCL) into full container lot (FCL);
- Control over container stuffing;
- Cargo certification;
- Container delivery to the origin port by the railways or by the truck;
- Forwarding services at the port;
- Re-addressing at the time of container's being in sea;
- Storage and return of empty containers to the specially equipped ports' warehouses;
- Customs processing of the cargoes;
- Unstuffing of the container into separate loads;
- Reloading the cargo from the container into the tented trucks and delivery to the destination warehouse;
- Information, legal and logistics services.

The direct agreements with the liners help us to minimize costs on ocean freight.

HT has designed a comprehensive door-to-door solution for your small consignments delivery from all over the world to Ukraine by direct sailings.

Groupage cargo carriage option allows using one vehicle for transporting several consignments being sent by different consignors to different consignees.

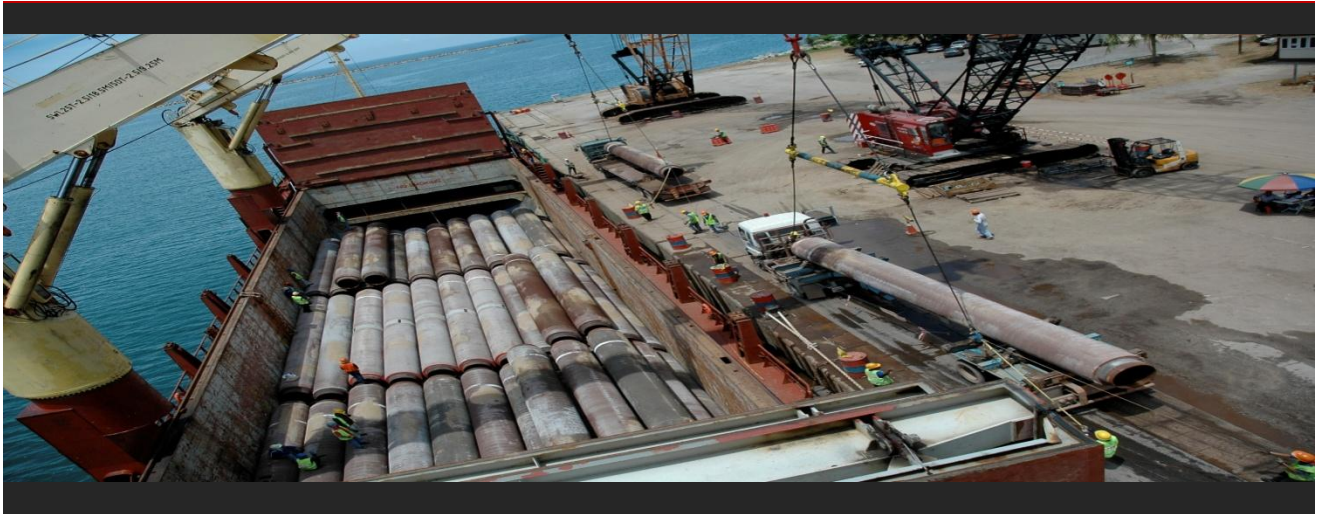

Cargo is being delivered to warehouses at loading ports and departing to Odessa on a weekly basis. Then the goods are transported to consignees in Ukraine, Belarus, Moldova and Russia.

Express deliveries of small consignments are carried out directly by small size vehicles.

For customers in Ukraine, Belarus, Molodva and Russia, HT ships small consignments as a part of groupage cargo by its own weekly long-distance hauls Shanghai, Singapore & Istanbul. Well-established routes and convenient warehouse locations guarantee timely and cost-effective delivery of your cargo.

**Benefits of using HT for groupage cargo carriage:**

- regular hauls from any place in the world
- cargo delivery to remote regions of Ukraine
- intermediate warehouses in Odessa
- express delivery of small consignments by small size motor vehicles
- company-owned customs brokerage services
- a fleet of modern trucks
- cargo tracking and tracing

## BULK & HEAVY CARGO

We have wide experience of working with a vast range of export and import cargoes in the ports of Ukraine and provide a whole range of cargo forwarding and transshipment services in a port. We forward and transship cargoes in all ports of Odessa, Nikolayev and Ismail Regions, and also in Dnepropetrovsk, Nikolayev and Nikopol River Ports.

The following operations are included in the range of works concerning bulk cargoes forwarding:

- Acceptance of cargo; operations with surface transport facilities;
- Discharging cargoes onto a site or into a warehouse;
- Storage and warehouse operations;
- Moving cargo to the cargo front;
- Loading / discharging of vessels;
- Additional cargo handling operations (stowing, separation, lashing, quantity determination, etc.);
- Issuing shipping documents (acceptance certificates, manifests, cargo-plan, bills of lading, etc.);

## CARGO TRANSLOADING

A cargo needs to be transloaded during the track gauge changeover or during the transport mode change depending on the delivery pattern. The transloading can be carried out both directly from one rolling stock to the other and with cargo stowing at temporary storage warehouses and its further loading on another vehicle type.

### Transloading Types

- transloading from narrow gauge wagons to wide gauge wagons, and vice versa
- transloading from road transport to any type of railway vehicles (container, wagon, flat wagon, specialized rolling stock), and vice versa
- transloading from sea containers to any type of railway vehicles and motor vehicles, and vice versa
- transloading from railway vehicles to ferries or ships for further transportation by sea, and vice versa

### HT arranges

- manual transloading
- automatic transloading
- transloading of oversized and overweight cargo under the supervision of qualified experts

If required, we design a pattern of cargo loading and its fastening on railway vehicles. Then we get this pattern approved at a departure railway station and we agree upon all the terms with the railway authorities of the route.

## AUTO TRANSPORT

Auto transport is one of the most widespread kind of cargoes' delivery in the international direction.

### HT offers you the following services of transportation:

- Delivery by motor transport of cargoes across Ukraine;
- Delivery by motor transport of cargoes across Europe and the CIS countries;
- Transportation of oversized goods;

Local distribution of goods is available both prior or after customs clearance. Special transit trucking option is available for part of full containers or consolidated consignment.

The trucking park of HT in Ukraine includes:

- 52 trucks for deliveries in full containers
- Bonded trucks

- TT-Club insurance that covers cargo loss up to USD 500'000 per incident
- Licenses to deliver goods to/from Russia, Belorussia, Moldova, Kazakhstan, Georgia and EU.
- All trucks are new (less than 4 years old) and are in line new EU ecology regulations
- 25 trucks with capacity of 45..95 cubic meters per truck
- Exclusive agreements with 5 mail couriers (mail and consignments that are less than 1 cubic meter or 1 ton)
- Transit time is one of the best in industry with optimal costs involved.

## RAILWAY TRANSPORT

We have wide experience of working with a vast range of export and import cargoes in the ports of Ukraine and provide a whole range of cargo forwarding and transshipment services in a port. We tranship cargoes in all ports of Odessa. The following operations are included in the range of works concerning bulk cargoes forwarding: Rail transport is characterized by a wide variety of rolling stock, which allows transporting cargo of various dimensions to any distance and use any method of loading.

- unitized cargo with manual or automatic loading is transported in covered wagons or containers
  - overweight and oversized cargo with overhead loading is transported in open wagons or on flat and transporter wagons
  - bulk cargo is transported in open wagons or by using a specialized rolling stock
  - for transporting motor vehicles and other specialized cargo we use specialized application-specific wagons.
  - Additional cargo handling operations (stowing, separation, lashing, quantity determination, etc.);
  - Issuing shipping documents (acceptance certificates, manifests, cargo-plan, bills of lading, etc.);
- Advantages of rail carriage
- high loading capacity of cars allows transportation of more goods in one unit of the rolling stock. One covered wagon has the loading capacity of 3 motor vehicles.
  - ability to transport lightweight and voluminous cargo (over 120 m<sup>3</sup>) on a wagon train, which is very convenient in case of long hauls
